GAME DESCRIPTION

Echoes of the Heart is an interactive narrative game where the player, as a third party, intercepts the email exchange of two psychologists discussing love and relationships. The challenge is to impersonate one of them convincingly, shaping the conversation while avoiding detection.

GD CANVAS

PLAYFULNESS

- Players experiment with dialogue choices, testing different responses to navigate the deception.
- The game encourages exploration of psychological concepts related to love and relationships.

CHALLENGE

- The primary challenge is crafting responses that match the tone, style, and psychological theories discussed.
- Players must analyze emails, detect key discussion points, and respond strategically.

SENSEMAKING

- Players interpret and reconstruct the evolving discussion on love and relationships.
- The game allows for multiple perspectives on emotional connections, commitment, and trust.
- Players experience the consequences of ethical decision-making in deception.

└ MDA FRAMEWORK APPLICATION ─

MECHANICS

- Text-based email interactions.
- Response selection system.
- Credibility scoring mechanism.

DYNAMICS

- Tension between deception and discovery.
- Psychologists' responses shift based on player's choices.
- Narrative adapts to the player's success or failure in impersonation.

AESTHETICS

- Themes of intrigue and intellectual challenge.
- Emotional engagement in navigating relationships and deception.

PLAYER MOVEMENTS

GAME NARRATIVE

GAME SOUND

TITLE SCREENS AND MENUS

Music: A calm and atmospheric piece of music that creates a sense of tension, mystery and intrigue. This music will play during the game's startup and in the menus.

Sound Effects: Click sounds when the player selects options from the menu.

Contextual Music: Music that changes depending on the game's situation (e.g., more intense music when the player is in a critical moment).

EMAIL WRITING SCREEN

Typing Sounds: Typing sounds when the player is writing the email.

Send Button Sound: A sound when the player presses the "Send" button.

Ambient Sounds: Sounds that create an atmosphere, such as the sound of wind or a typewriter, to give the feeling that the player is in an office.

GAME SOUND

CHARACTER SOUNDS

Breath/Heartbeat: Sounds that build tension, especially when the player is in a difficult situation or trying to avoid detection.

MESSAGE NOTIFICATION

Notification Sound: A soft but distinct sound that plays when the player receives a new message or notification. This sound should be attention-grabbing but not overwhelming, ensuring the player is aware of incoming information without breaking immersion.

EMOTIONAL SCRIPT

Emotion-Building Music: Music that evokes emotions, such as tension, relaxation, or sadness, depending on the story's progression.

Achievement/Failure Sounds: Sounds that signal success or failure. For example, a cheerful sound when the player achieves something, or a serious sound when they fail.

MENU

EMAIL SENDING SCREEN

MOCKUPS

Mockup for the Menu

Background: A simple yet atmospheric image that conveys a sense of mystery (for example an office with a computer and some books).

Buttons: Buttons for "New Game," "Options," "Exit." Each button will produce a click sound when the player selects it.

Music: The calm music mentioned above will play in the background.

Mockup for the Email Sending Screen

Background: An image of an office with a computer and an open email client. The player will see a blank field to write the email.

Typing Area: A blank box where the player will write the email. When the player types, the sound of typing will be heard.

Send Button: A "Send" button at the bottom of the screen. When the player presses the button, a sound will play indicating that the email has been sent.

THANK YOU!
